## MAJOR THEMES IN FLOWERING RESEARCH

Preface	<i>Richard Wilbur</i> Thyme flowering among rocks	iv
<b>Environmental Perception</b>		
<i>Sung S, Amasino RM.</i>	Molecular genetic studies of the memory of winter	3369
<i>Marquardt S, Boss PK, Hadfield J, Dean C.</i>	Additional targets of the <i>Arabidopsis</i> autonomous pathway members, FCA and FY	3379
<i>Thomas B.</i>	Light signals and flowering	3387
<b>Floral Signalling</b>		
<i>Corbesier L, Coupland G.</i>	The quest for florigen: a review of recent progress	3395
<i>Lifschitz E, Eshed Y.</i>	Universal florigenic signals triggered by <i>FT</i> homologues regulate growth and flowering cycles in perennial day-neutral tomato	3405
<i>Jaeger KE, Graf A, Wigge PA.</i>	The control of flowering in time and space	3415
<b>Flower Development</b>		
<i>Ciannamea S, Kaufmann K, Frau M, Nougalli Tonaco IA, Petersen K, Nielsen KK, Angenent GC, Immink RGH.</i>	Protein interactions of MADS box transcription factors involved in flowering in <i>Lolium perenne</i>	3419
<i>Kater MM, Dreni L, Colombo L.</i>	Functional conservation of MADS-box factors controlling floral organ identity in rice and <i>Arabidopsis</i>	3433
<i>Teeri TH, Uimari A, Kotilainen M, Laitinen R, Help H, Elomaa P, Albert VA.</i>	Reproductive meristem fates in <i>Gerbera</i>	3445
<i>Balanzá V, Navarrete M, Trigueros M, Ferrándiz C.</i>	Patterning the female side of <i>Arabidopsis</i> : the importance of hormones	3457
<b>Evolution of Flowers and Inflorescences</b>		
<i>Bateman RM, Hilton J, Rudall PJ.</i>	Morphological and molecular phylogenetic context of the angiosperms: contrasting the ‘top-down’ and ‘bottom-up’ approaches used to infer the likely characteristics of the first flowers	3471
<i>Kellogg EA.</i>	Progress and challenges in studies of the evolution of development	3505
<i>Sokoloff D, Rudall PJ, Remizowa M.</i>	Flower-like terminal structures in racemose inflorescences: a tool in morphogenetic and evolutionary research	3517
<i>Hintz M, Bartholmes C, Nutt P, Ziermann J, Hameister S, Neuffer B, Theissen G.</i>	Catching a ‘hopeful monster’: shepherd’s purse ( <i>Capsella bursa-pastoris</i> ) as a model system to study the evolution of flower development	3531
